## Single-firm Optimization Model

## **Equilibrium Model**

	Optimization Program of firm <i>f</i>				
	maximize : $\Pi^f(x)$				
	subject to: $h^f(x) = 0$ $g^f(x) \le 0$				
Supply = Demand					
Electricity Market					

Optimization Program of Firm 1		Optimization Program of Firm <i>f</i>
maximize: $\Pi^1(x^1)$ subject to: $h^1(x^1) = 0$ $g^1(x^1) \le 0$	•••	maximize: $\Pi^f(x^f)$ subject to: $h^f(x^f) = 0$ $g^f(x^f) \le 0$
		Supply = Demand
	T	Electricity Market

maximize:  $\Pi^F(x^F)$ subject to:  $h^F(x^F) = 0$   $g^F(x^F) \le 0$ 

Optimization Program

of Firm F
